PROJECT: 113

Recycled Paper

YOU'LL NEED:

DETAILS:

Our planet is literally one of a kind. We must protect it and keep sustaining it. Remember your 3 R's today and everyday.

REDUCE. REUSE. RECYCLE.

Here is a fun way to make recycled paper at home!

Newspaper
Large Pan
Flat Board
Blender
Water
Screen

CONNECTING WITH:

Our Planet Earth

INSTRUCTIONS:

1. Tear up two sheets of newspaper into small pieces.
2. Put the pieces in a blender with 4 cups of water. (Have an adult help with the blender)
3. Place the screen in the pan and cover it with water. Put the newspaper mixture, called pulp, on the screen. Spread the pulp evenly across the screen.
4. Remove the screen with the pulp on top from the water-filled pan, letting the water drip off first. Place the screen and pulp inside a section of newspaper.
5. Lay the flat board on top of the screen and squeeze the water out of the paper.
6. Carefully remove the screen from the layer of pulp. Let the pulp dry.
7. Once fully dried, paint your version of Mother Earth on your new recycled paper!

DIY your Screen.

*Find an old picture frame,
and find nylons, stockings
or even a scrap of any mesh
fabric that doesn't break easily.
Place the Fabric tight against
the picture frame and staple
together very tight.*
